

# PRO COLOR CHIPS

## Commercial Product Data Sheet

### **Product Description**

Pro Color Chips are a blend of pigmented polymer flakes mixed with natural quartz. Pro Color Chips are designed for use as a surfacing component of Terapro Waterproofing Systems on horizontal applications.

### **Product Uses**

Pro Color Chips are broadcast into the Pro Color Finish embedment layer of Terapro Waterproofing and Surfacing Systems (reinforced and unreinforced) to achieve an aesthetic, skid-resistant surface.

### **Color**

Pro Color Chips are supplied in eight standard color finishes:

Med. Gray #200  
Light Gray #210  
White #220  
Brown #230  
Camel #240  
Red #250  
Patina #260  
Tan #270

Each standard color includes a blend of pigmented chips to add surface dimension and camouflage matter accumulation over a finished Terapro System.

### **Coverage Rate**

Approximate consumption: 0.2 lb/sf (0.092 kg/sf) (1 kg/m<sup>2</sup>)

See Terapro Installer's Guide for specific application information.

### **Application**

Remove Pro Color Chips from box and reblend before application. Pro Color Chips are broadcast into a layer of Pro Color Finish Resin before the resin material sets. To properly broadcast Pro Color Chips, project the chips using a gravity-fed pneumatic hopper gun to achieve even distribution. Full and uniform coverage should be achieved. After the Pro Color Finish layer of resin is set, any loose Pro Color Chips may be removed by blowing with oil-free compressed air or brooming using a clean, soft-bristle broom.

Following the application of Pro Color Chips, the system should be completed with a layer of Pro Clear Finish Resin, satin finish.

### **Storage**

Store in closed containers on a clean, flat surface. Boxes should not be dropped. Store in a dry place, out of direct exposure to the elements.

### **Handling**

Avoid generating dust. Consult the Material Safety Data Sheet (MSDS) for additional information pertaining to this product.

### **Packaging**

Pro Color Chips are supplied in a 10-kg (22 lb) cardboard box lined with a polyethylene bag.

Box Size: 8 in x 11 in x 9 in (20 cm x 28 cm x 23 cm)

Pallet: 41 in x 48 in (104 cm X 122 cm) wooden pallet

Number of Boxes per Pallet: 100
