

PARADRAIN DRAINAGE MAT

Commercial Product Data Sheet

Product Description

Paradrain Drainage Mat is designed for drainage applications requiring high compressive strength, high flow capacity, and the strength and filtration properties of a woven geotextile.

Product Uses

Paradrain Drainage Mat is a two-part prefabricated sheet drain and protection board consisting of a formed polypropylene core covered on one side with a woven polypropylene filter fabric. The fabric allows water to pass into the drain core while restricting the movement of soil particles that could potentially block the core. The core allows water flow to designed outlets. Full coverage protection is provided to waterproofing materials.

Storage and Handling: All Siplast drainage mat products should be stored on end on a clean, flat surface. Care should be taken that rolls are not dropped on ends or edges and are not stored in a leaning position. Deformation resulting from these actions will make proper installation difficult. All products should be stored in a dry place, out of direct exposure to the elements, and should not be double stacked. Material should be handled in such a manner as to ensure that it remains dry prior to and during installation.

TYPICAL PROPERTIES	VALUE	TEST METHOD
Fabric Properties		
Material	Polypropylene	
Grab tensile strength	365 x 200 lb	ASTM D 4632
Puncture strength	100 lb	ASTM D 4833
Flow rate	185 gpm/ft ²	ASTM D 4491
Core Properties		
Material	Polypropylene	
Thickness	0.40 inch	
Compressive strength	21,000 lb/ft ²	ASTM D 1621 (Mod.)
Product Properties		
Flow capacity per gpm/ft width	21 gpm/ft	ASTM D 4716
Roll length	50 ft	
Roll width	4 ft	
Roll weight	50 lb (22 kg)	

Packaging: 6 units per pallet
