

PRO ACCENT CHIPS

Commercial Product Data Sheet

Product Description

Pro Accent Chips are a blend of pigmented polymer flakes. Pro Accent Chips are designed for use as a surfacing component of Terapro Waterproofing Systems on horizontal applications.

Product Uses

Pro Accent Chips are broadcast into the top coat of Pro Color Finish of Terapro Waterproofing and Surfacing Systems (reinforced and unreinforced) to achieve an aesthetic surface.

Color

Pro Accent Chips are supplied in two standard blends:

Black and White Blend
Tan and Black Blend

Each standard color blend of pigmented chips adds surface dimension and camouflages matter accumulation over a finished Terapro System.

Coverage Rate

Approximate consumption:
0.01 kg/sf (1 kg/sq) (0.1 kg/m²)

See the Terapro Installer's Guide for specific application information.

Application

Remove Pro Accent Chips from box and reblend before application. Pro Accent Chips are broadcast into the top layer of Pro Color Finish Resin before the resin material sets. To properly broadcast Pro Accent Chips, project the chips using a gravity-fed pneumatic hopper gun to achieve even distribution. Uniform coverage should be achieved.

Storage

Store in closed containers on a clean, flat surface. Boxes should not be dropped. Store in a dry place, out of direct exposure to the elements.

Handling

Avoid generating dust. Consult the Material Safety Data Sheet (MSDS) for additional information pertaining to this product.

Packaging

Pro Accent Chips are supplied in a 5-kg (11 lb) cardboard box lined with a polyethylene bag.

Box Size: 8 in x 11 in x 9 in (20 cm x 28 cm x 23 cm)

Pallet: 41 in x 48 in (104 cm x 122 cm) wooden pallet

Number of Boxes per Pallet: 100
