**Product Description**
Parabase is an asphalt coated fiberglass base sheet or base ply. Parabase consists of a lightweight random fibrous glass mat impregnated and coated with a specially formulated, high quality, oxidized asphalt.

**Product Uses**
Parabase is designed for use under guaranteed Siplast Roof Systems in certain nailable applications. Parabase can also be used as a ply sheet in certain guaranteed Siplast Roof Systems. In nailable applications, Parabase is lapped 3 inches (7.6 cm) at sides and 6 inches (15.2 cm) at ends and is mechanically fastened according to Siplast requirements. In mopping applications, Parabase is lapped 3 inches (7.6 cm) sides and ends, and is applied in approved Type IV asphalt.

**Product Approvals**
Parabase meets or exceeds the requirements of ASTM D 4601 Type II for asphalt coated, fiberglass base sheets.

Parabase is approved by FM Approvals (FM Standard 4470) for use as a nailed base sheet in Siplast Paradiene 20/30, Veral, and Parafor 50 LT non-insulated lightweight concrete roof deck constructions, subject to FM conditions and limitations.

Parabase has been classified by Underwriters Laboratories as a cULus rated G2 Base Sheet. Parabase is approved by Underwriters Laboratories for use in UL Classified Siplast Paradiene 20/30, Paradiene 20/30 FR, Veral, Paradiene 40 FR, and Paratech FR Roof Systems. Contact Siplast for specific cULus Classified roof systems using Parabase.

Siplast Roof Systems also have received the approval of many regional and local authorities. Please contact Siplast for specific information as required.

Top Surfacing: Silica Parting Agent
Back Surfacing: Silica Parting Agent

Lines: Two laying lines are placed 3 in (7.6 cm) and 12 1/2 in (31.8 cm) from each edge of the material. The line color for this material is white.

 Packaging: The palleted material is protected by a heat shrink polyethylene shroud.

Pallet: 40 in X 48 in (101.6 cm X 122 cm) wooden pallet
Number Rolls Per Pallet: 20
Number Pallets Per Truckload: 18
Minimum Roll Weight: 60 lb (27.2 kg)

Storage and Handling: All Siplast roll roofing products should be stored on end on a clean flat surface. Care should be taken that rolls are not dropped on ends or edges and are not stored in a leaning position. Deformation resulting from these actions will make proper installation difficult. All roofing should be stored in a dry place, out of direct exposure to the elements, and should not be double stacked. Material should be handled in such a manner as to ensure that it remains dry prior to and during installation.
