Parasolo PVC KEE Conical Pipe Boots are formed from unreinforced PVC KEE and are used for flashing cylindrical and conical penetrations. Boots include a stainless steel clamp to facilitate termination at the top of the boot.

Contact Siplast for specific approval on product uses.

**Application**

Refer to the applicable Siplast Technical Guide and Siplast PVC Detail Manual for detailed information on application of Parasolo PVC KEE Split Pipe Boots. Parasolo PVC KEE Split Pipe Boots can be used in conjunction with both Parasolo and Parasolo KEE membrane systems.

**Storage and Handling**

All Siplast roofing products should be stored on a clean, flat surface out of direct exposure to the elements. Material should be handled so that it remains dry prior to and during installation.

**Packaging**

Packaging: Box of 12 units  
Weight: 12.5 lbs (5.7 kg) per box  
Boxes per pallet: 48
