Irex / Veral - Rigid Insulation

Conduit/Smal Pipe Penetration

Notes:
1. Where primer is required to maintain proper adhesion, T-19 primer is required for all primer and applications. Use primer or paint as per all primer or paint manufacturer's recommendations.
2. Insulation components should be designed and fabricated according to generally accepted industry practices, standards, and applications.
3. Non-preformed in a factory. Contact supplier for specific requirements.
4. The components and metal parts shown do not depict shop fabrication and purchase. All controls are to be specified for the project.

1. IREX (fully adhere)
2. METAL FLANGE
3. VERAL (touch apply)
4. PS-30A SEALANT
5. METAL FLASHING
