IREX / VERAL - RIGID INSULATION
PARAGUARD RAISED EDGE

N.T.S.

REVIEW 02 25 11
Rel. 1. Please raise edge - veral rigid

CAUTION: Sprayed rigid insulation. Always have approved fire-extinguishing equipment nearby.

WARNING: Applications and recommendations detailed in spray specification shall apply in addition to the above drawing.

1. Securement and anchorage details are shown in the Assembly and should be constructed according to generally accepted practice, standards, and approvals.

2. The components shown are shown for reference only and should be constructed according to generally accepted practice, standards, and approvals.

3. Prepare surface prior to laying of thermal insulation.

4. Securement shall be performed in accordance with specified requirements.

5. Wherever primer is not specified to maintain proper adhesion, TA-1-1 primer is required. Use all products to provide bonding and stopping putty applications. Use 5A-1-123 or equivalent for all.

6. Rigid insulation is not recommended for use as a substitute for veral.
