**Specification: 2030 PSH-A**

Requirements and recommendations detailed in the Siplast catalog and Siplast long form specifications shall apply in addition to the following recommendations and specifications.

**Application**

1. Lay one ply of Parabase FS dry over the entire area to be roofed. Lay each sheet 3 inches over the underlying sheet and lap ends 6 inches. Using approved fasteners, nail each sheet every 9 inches through the laps and stagger nail the remainder of the sheet in two rows on nominal 12 inch centers with fasteners in each row on 12 inch centers. *The fastening pattern shown in this specification is based on Siplast standard nailing requirements. Contact Siplast for the recommended fastening patterns to meet specific testing or code approvals.*

2. Beginning at the low point of the roof, fully mop one ply of Paradiene 20 to the Parabase FS surface using PA-100 Asphalt, lapping sides and ends a minimum of 3 inches. Offset end laps a minimum of 3 feet.

3. Beginning again at the low point of the roof, fully adhere one ply of Paradiene 30 FR to the Paradiene 20 surface using PA-311 Adhesive, lapping sides and ends a minimum of 3 inches. Offset end laps a minimum of 3 feet. Stagger laps between plies.
