PARASOLO ROOF MEMBRANE SYSTEMS
ADHERED SYSTEM

Specification: SPRBNTIN - All thickness - Smooth

Requirements and recommendations detailed in the Siplast catalog and Siplast long form specifications shall apply in addition to the following recommendations and specifications.

Application

1. Install approved insulation according to manufacturer's recommendations and FM Global requirements, if applicable. The edges of insulation panels should be in moderate contact without forcing and cut to fit neatly against adjoining surfaces. The insulation layer should present a smooth surface to accept the roof membrane.

2. Loose lay one ply of Parasolo PVC membrane without wrinkles or buckles. Fold back the membrane in the long dimension one half sheet at a time. Do not crease. Apply Parasolo PVC Quick-Lay Adhesive at the prescribed rate to the roof substrate surface. Adhere approximately one half of the membrane sheet at a time. Close membrane into the adhesive and broom membrane to ensure complete bonding between adhesive and membrane. Lap Parasolo membrane at sides a minimum of 3 inches.

3. Heat weld all laps using approved welding equipment and in accordance with heat-welding guidelines.
