

SIPLAST*FLASH*

Siplast Lightweight Insulating Concrete Roof Insulation Systems have a successful performance history that began in the 1930s. Their capacity to decrease membrane temperature and reduce membrane temperature fluctuations, together with their physical characteristics make lightweight insulating concrete systems a reliable substrate for roofing membranes. Whether it is a Siplast roof membrane system or another roof membrane manufacturer, our lightweight insulating concrete systems will benefit your roof installation and building.

Siplast warranties are issued and backed by Siplast and if you use Siplast Roof Membrane Systems with Siplast Lightweight Insulating Concrete there is no additional charge for warranting the Siplast Lightweight, only the roof membrane warranty cost.

Standard warranty procedures apply, including warranty paperwork, Siplast field inspections, performance of a nail pull test prior to membrane application, and payment of warranty fees. The warranty fee schedule is as follows:

10-year: \$2.00 per roofing square (100 sq. ft.), min. charge 100 squares.

15-year: \$4.00 per roofing square (100 sq. ft.), min. charge 100 squares.

20-year :\$6.00 per roofing square (100 sq. ft.), min. charge 100 squares.

25-year :\$10.00 per roofing square (100 sq. ft.), min. charge 100 squares.

30-year: \$12.00 per roofing square (100 sq. ft.), min. charge 100 squares.
