

Siplast® SBS Self-Adhesive System

An easy to apply self-adhesive (SA) SBS-modified bitumen membrane system.

Features & Benefits

FLAMELESS, PEEL AND STICK APPLICATION

After relaxation, each roll can be adhered in minutes, reducing membrane install time in comparison to non SA membrane options, while also decreasing the need for specialized installation skills.

FULLY HEAT-WELDED SELVAGE

Hot air welded selvage greatly minimizes potential selvage stepdown air gaps and maximizes long term performance.

PRO BASE “INTEGRALLY PRIMED” SYNTAN® ACRYLIC TOP SURFACE

Proprietary factory coating provides a built in primer layer for optimal adhesion to the cap ply. With no primer needed and a smooth, easy-to-clean acrylic surface, self-adhesive SBS-modified bitumen membrane installations are cleaner and easier to install than applications using a cold adhesive process.

Siplast SBS Self-Adhesive System

PARADIENE 30 FR SA FINISH PLY

The ANSI/UL790 fire-rated SBS-modified bitumen finish ply utilizes a random fiberglass reinforcement and is coated with high quality SBS-modified bitumen surfaced with ceramic granules. The back surface of the sheet is coated with an ultra-tacky self-adhesive SBS bitumen layer and lined with a high-strength polyolefin release film.

PARAFOR® 30 SA FINISH PLY AND FLASHING

The ¾ square net coverage SBS-modified bitumen finish ply and flashing sheet utilizes a composite fiberglass scrim and polyester mat reinforcement. The back surface of the sheet is coated with an ultra-tacky self-adhesive SBS bitumen layer and lined with a high-strength polyolefin release film.

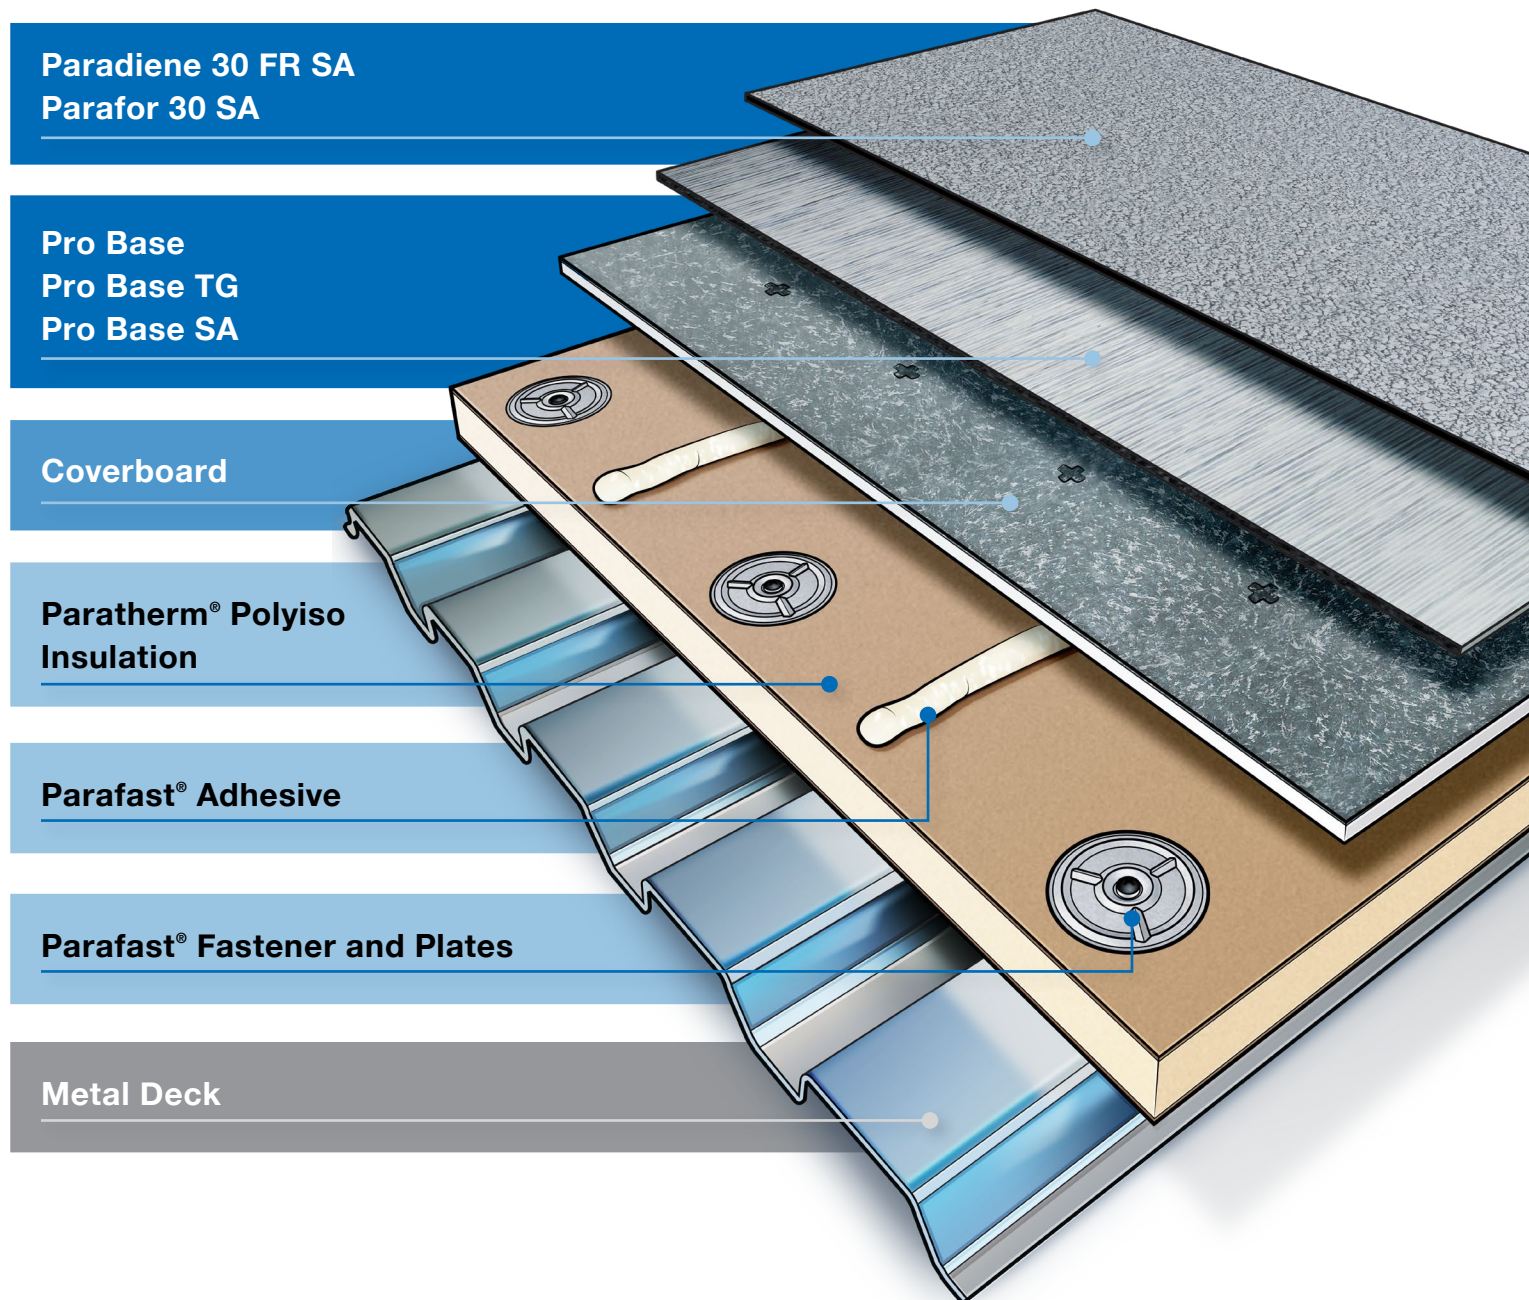

PRO BASE PLY

The acrylic coated, SBS-modified bitumen base sheet for the Siplast SBS Self-Adhesive System, Pro Base utilizes a random fiberglass reinforcement, coated with high quality SBS-modified bitumen and surfaced with proprietary Syntan acrylic coating for optimal SA Cap Sheet adhesion.

Pro Base Deckside Surface Options:

- Pro Base SA: ultra-tacky self-adhesive SBS-modified bitumen layer lined with a high-strength polyolefin release film for fully self-adhesive systems
- Pro Base: sanded finish for cold adhesives
