

# Parasolo® TPX™ T-Top Vent

## TPX Accessories

### Description

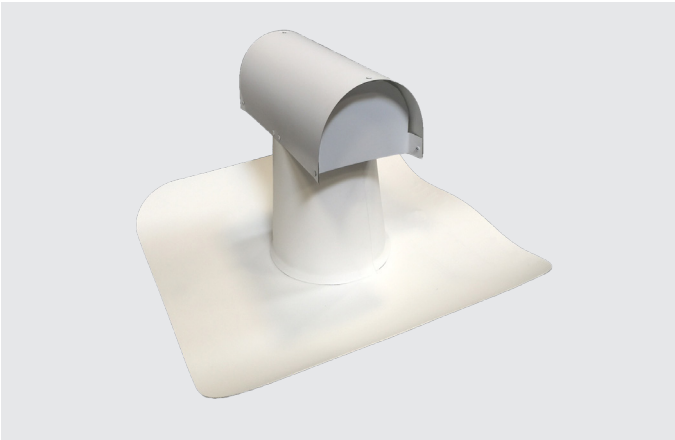

Save time and labor costs with easy-to-install Parasolo® TPX™ T-Top Vents. These factory-built accessories reduce risk of leaks and callbacks, and help create a uniform aesthetic.

### Application

T-Top TPX™ flashing is factory-welded reinforced membrane and has a 3 in. weldable flange. The T-shaped hood is made of SMP-painted steel, closely matching the color of the TPX™, and is designed with ends or “ears.” T-Top vents are not for use in dryer exhaust applications. All T-Top vents come standard with an 1/8 in. galvanized wire mesh and are available in two standard sizes: 4 in. (102 mm) and 6 in. (152 mm).

### Product Information

Parasolo® TPX™ T-Top Vents are composed of reinforced 60 mil TPX™ membrane and SMP-painted steel. Custom colors are available. Contact your local rep for details. The vents are part of a comprehensive line of Parasolo® TPX™ accessories that use a proprietary formulation.
