

Pro Prep

Commercial Product Data Sheet

Description:

Pro Prep is a clear, blended solvent used to clean and prepare cured liquid-applied systems and to clean tools and equipment.

Contact Siplast for information on approved product uses.

Uses:

Cleaning Agent

Drying Time	Approximately 20 minutes
Personal Protection Equipment	Butyl Rubber or Nitrile Gloves Only

Application:

Refer to applicable Siplast Technical or Installers Guide for detailed information on product uses.

Storage & Handling:

Store indoors in a well ventilated, cool, dry area away from heat, open fire, ignition sources, and direct sunlight. Store jobsite materials on pallets in a shaded, well ventilated area. Pro Prep does not have a shelf life but may evaporate over a period of time.

Avoid skin and eye contact with this material. Avoid breathing fumes. Do not eat, drink, or smoke in the application area.

See product packaging and the Safety Data Sheet for specific information on the safe handling of this product.

Packaging:

- 1 gal. (3.8 L) resealable metal F-style can
- 5 gal. (19 L) resealable metal pail with pour spout and removable lid
