

# Pro Prep M

## Commercial Product Data Sheet

### Description:

Pro Prep M is a clear, blended solvent used to clean and prepare cured liquid-applied systems and to clean tools and equipment. Pro Prep M is specifically formulated to meet the regulations for select air quality districts.

Contact Siplast for information on approved product uses.

### Uses:

Cleaning Agent

|                                      |                                     |
|--------------------------------------|-------------------------------------|
| <b>Drying Time</b>                   | Approximately 20 minutes            |
| <b>Personal Protection Equipment</b> | Butyl Rubber or Nitrile Gloves Only |

### Application:

Refer to applicable Siplast Technical or Installers Guide for detailed information on product uses.

### Storage and Handling:

Store indoors in a well-ventilated, cool, dry area away from heat, open fire, ignition sources, and direct sunlight. Store jobsite materials on pallets in a shaded, well ventilated area. Pro Prep M is shelf-stable but may evaporate over time. Keep tightly sealed.

Avoid skin and eye contact with this material. Avoid breathing fumes. Do not eat, drink, or smoke in the application area.

See product packaging and the Safety Data Sheet for specific information on the safe handling of this product.

### Packaging:

5 gal. (19 L) resealable metal pail with pour spout and removable lid.
