PARAFOR® 30 BW

Commercial Product Data Sheet

Parafor® 30 BW is the modified bitumen finish ply of the Paradiene 20/Parafor 30 BW System. Designed for use in homogeneous multi-layer modified bitumen roof membrane systems, Parafor 30 BW consists of a fiberglass scrim/polyester mat composite impregnated and coated with high quality styrene-butadiene-styrene (SBS) modified bitumen, and is surfaced with highly reflective, white mineral granules.

Contact Siplast for information on approved product uses.

PRODUCT INFORMATION

Application

Refer to the Siplast Technical Guide for detailed application information and slope limitations. Parafor 30 BW is lapped 3 inches (76.2 mm) at sides and 6 inches (152 mm) at ends.

Storage and Handling

All Siplast roll roofing products should be stored on end on a clean, flat surface. Rolls should not be dropped on ends or edges or stored in a leaning position. Deformation resulting from these actions will make proper installation difficult. All roofing products should be stored in a dry place out of direct exposure to the elements and should not be double stacked. Material should be handled so that it remains dry prior to and during installation.

See product packaging and the Safety Data Sheet for specific information on the safe handling of this product.
